

Sprint No	Priority	Description	Estimated Delivery Date
1	1-Urgent	Redesigned Text options like snapchat with following features: 1) When you press the T you should not have to then press the +. It should automatically open the keyboard so that you can quickly start typing. 2) When the keyboard is open you should be able to choose the fonts and color right there without having to press additional buttons. 3) User can change the color 4) User can change the font 5) User can switch between classic text and free text	22-Oct-2018
2	1-Urgent	In all messaging the camera icon should bring up the same main app camera flow but at the options screen have the group/event/person pre selected. Currently it doesn't display options screen at all.	24-Oct-2018
	2	When you have an event open on the screen then is it possible to make things like attendance and polls update real time so you don't have to exit then go back multiple times for them to update?	
	1-Urgent	The all items toolbar should stay open by default. It would be great if there were a way to hide the toolbar.	24-Oct-2018
3	2	Ability to reorder categories. Following should always be at bottom of list.	31-Oct-2018
	2	If someone is added/invited to a group or event by someone else then have it say who they were added by in the members list. Also show the date they joined the group/event. Also have a Note Request setting: When turned on then when someone joins or requests to join via URL/QR code then it would ask then whatever custom question the admin is asking. The user would then fill in to answer the question and/or attach a picture. In the members list there would be a note icon that the can be pressed to view this info.	
4	2	Giphy sticker API for pictures. Here is the info on that: <a href="https://developers.giphy.com/docs/#sticker-endpoint">https://developers.giphy.com/docs/#sticker-endpoint</a> and <a href="https://engineering.giphy.com/new-stickers-api-available/">https://engineering.giphy.com/new-stickers-api-available/</a> .	29-Nov-2018
	3	On Friends tab have an "All" option under Stories, Distance, All Friends. On all tagging and adding people to groups/events, have filter options of "Nearby", "All", "Categories", "Groups", "Events".	29-Nov-2018
5	3	Have friends "notes" field display in tagging and add to events and groups. Be able to search by the same. This way if you are tagging someone then be able to search by their note as well as their name.	6-Dec-2018
6	3	Dark theme and small update to looks main screen of each tab. Vero app, Bird app, Groupme dark theme, good examples. Updating the events settings screens made a huge difference so let's look at updating these 5 screens as well.	17-Dec-2018
7		Giphy sticker API for videos. Here is the info on that: <a href="https://developers.giphy.com/docs/#sticker-endpoint">https://developers.giphy.com/docs/#sticker-endpoint</a> and <a href="https://engineering.giphy.com/new-stickers-api-available/">https://engineering.giphy.com/new-stickers-api-available/</a> .	21-Dec-2018
8	4	Read/Delivered status in messaging. Had it when the module was very first rolled out but have not had it since. Following things are covered: 1) In P2P chat user can get update for sent, delivered and read. The notification will be of update like change in icon color or icon type 2) If message is sent in group or event, user can long press or click on message at particular location to get the status of delivery, sent and read by its members.	28-Dec-2018
	3	New Friends Tab and playing stories design aka highlights. (This had previously been partially implemented in Bubble as "featured items"). On the post options screen you have the option to set an item as "Highlight" This would be denoted by a star. You can only "star/highlight" one item per day. If you attempt to star an item but have already starred another item during the current day then a popup comes up with a Thumbnail of the item you have already starred and says "You have already chosen this as your featured item for today. Would you like to feature the new item or keep this item featured?". Also, on the Friends tab there is a new option called "Highlights" where these items are then displayed in an Instagram style format instead of a story style format. See attached.	
10	3	On the P2P messages tab change the icon to the attached "dissolve" icon. When engaged then it works similar to how it does now except as each item/message is posted there would be a timer of some sort. After 20 seconds the item starts to dissolve via an animate then disappears. <a href="https://thenounproject.com/term/secret/71679/">https://thenounproject.com/term/secret/71679/</a>	11-Jan-2019
	4	Deleting own messages / others messages, does not actually delete them from the conversation.	
	4	Ability to pick your top 6 friends and the order they appear. This would be set on under settings and can be turned off/on. They would display on the ME tab.	11-Jan-2019
	4	Broadcast message edit: On web have two options... 1) Version Update 2) Message. OPTION 1: Version update- will notify all users who are not on the most current version with push message. When they open the app via push message or normal then their would be a popup. In the popup it will say "A new version is now available...(whatever the custom message is)". At the bottom of the popup there would be a Later option or an Update option. Pressing Later will snooze the update for 1 day each time. Pressing Update would open the appstore to update. OPTION 2: Selecting Message would send a push notification with the message. Tapping the push notification or opening the app normal there would be a popup opened with the message displayed and an option to dismiss the message.	
11	4	Location based filters/stickers. Snapchat calls them geofilters. Facebook calls them Frames.	16-Jan-2019
	3	When taking a picture have options at bottom of screen of Text, Dynamic (combo video and camera like current), Multi Clip Video (like music.ly), Camera. And implement each of the same.	
12	3	Ability to add a "position" to people in events and groups. The only place this field would display would be in that conversation but no where else in the app. For example a business person may add "General Manager" as their position. Then in the conversation it would say "First Last General Manager".	17-Jan-2019
13	4	In messaging have it preserve whatever you typed into a text box if you leave the screen then go back to the screen. Currently it deletes and you have to retype it.	NA
	4	On the Samsung S9 there are blank spaces at top and bottom of screen. Similar to the issue we had with iphone X.	22-Jan-2019
