

UTSAV DAVE

Team Leader / Project Manager

PROFILE SUMMARY

An enthusiastic person with cogent communication skills always ready to acknowledge challenges. As a thriving project manager, I not only consider delegation as a transfer of responsibility but also consider guiding the subordinates during obscure scenarios. Having worked in IT field for over 4 years now, I have been able to deliver 15+ projects successfully. Holding on an innovating approach, I have always tried to withstand the dynamic technical world.

EXPERIENCE

iCreative Technologies (January 2018 - Present) Mobile Team Leader

- Handling the tasks of providing technical direction for developing, designing and integrating systems for customers.
- Responsible for defining project scope, goals and deliverables for achieving deadlines in reasonable time frame.
- Assigning tasks, monitoring and reviewing the work of the development team.
- Managing the hiring tasks and reviewing the performance of existing members on an annual basis.
- Creating and testing prototypes to keep up with new technology trends.
- Taking up the responsibility of communicating with client & renovating business solutions by representing product, design, web development, and product marketing.
- Maintaining a disciplined approach with team members.

Virtual Heights (April 2017 - January 2017) IOS Team Leader

- Managing team & providing the technical guidance to maintain the standard code quality
- Taking up the tasks of software design and architecture of mobile applications, along with providing support to Designers & UX teams.
- Participation in giving estimation of development tasks, testing, QA process, pair programming, troubleshooting & code debugging. Managing the hiring tasks and reviewing the performance of existing members on an annual basis.
- Involved in project management.

IndiaNIC (July 2015 - December 2016) Software Software Application Developer

- Be it requirement gathering or testing of application, I was involved in every stage and process of software development cycle. In a very short span I have designed apps, worked on web service, API, managed team and also communicated with client.
- Being a key member of the design and coding team, I assisted the members in developing the web-service and designing of database until client's approval.
- Having a good grip over both mobile platform (IOS & Android) and cross platform tool, I was also given the opportunity to manage several projects.
