PROJECTS

- **razer.com** (Angular, java hybris): Razer's award-winning hardware includes high-performance gaming peripherals and Blade gaming laptops. Razer's software platform, with over 150 million users, includes Razer Synapse (an Internet of Things platform), Razer Chroma RGB (a proprietary RGB lighting technology system supporting thousands of devices and hundreds of games/apps), and Razer Cortex (a game optimizer and launcher). Worked as team member for Front end developer.
- **shopgoodwill** (Angular 11, .net, sql server): Online Marketplace for Goodwill thrift stores. Goodwill's online stores give you the best of both worlds with shopgoodwill.com. Browse the virtual aisles of your local Tacoma stores or shop Goodwills across the country – your only limit is your internet speed. Shopgoodwill has all the options to help you find that unique something you've been searching for. When you create an account, you'll have access to: Set up Keyword searches – and we'll email you when an item is posted. Add to a Watch List – create a list of items you want to follow. Easy Search features – by keyword or pre-selected category
- **Xunison** (Angular 8, Wordpress, MQTT, Python, PostgreSQL Rest API): Xunison provides functional smart home and security solutions. Through their innovative product known as the X-Brain, the company provides an all-in-one solution thereby empowering users with smart homes technologies. X-Brain allows you to control Z-Wave, ZigBee, Wi-Fi and BT5.0 devices from your computer, mobile phone or even TV. As a central home Hub, X-Brain V1 plus can also monitor all your cameras, secure your home, and schedule automated scenes to make it a smarter way to live. We managed an admin panel which handles all the requests coming through the X-Brain device via mqtt and displaying it to the users, users can also manage all the devices like router, security camera, and other sensors through the admin panel.. (<https://account.xunison.com>, <https://business.xunison.com>).
- **Goplus2** (Angular 11, nodejs, mogndb): Future of event and communication management between people. Here is list of features, Login as the Organiser. Create your Event by setting up all necessary Parameters. Copy and share the invitation link. Once the time has come start the event. Greet all your participants in the Plus2-Waiting Lounge and brief them about the upcoming process. Start the randomised automated digital Speed Networking Event. All attendees are being matched automatically in each round
