PROJECTS

Quiz Web Application -(HTML, CSS, JS, Flask, MYSQL)

This web application was about users generating a quiz by adding questions and can later play it. This project contains basic CRUD operations for updating or deleting quizzes and a login, signup for users too.

SKILLS/TECHNOLOGY

Programming : C, JAVA, Python, HTML, CSS, Arduino, Dart

Database : MYSQL, PostgreSQL

Backend : Flask

App Development : Flutter

Cloud : Heroku, GitHub, Firebase

LANGUAGES

Gujarati, Hindi, English

ToDo List Application –(Flutter)

The application does the basic functions of generating a task, checking it and deleting it. It also saves the task on local device, using shared preferences, when the user closes the app.

QuizMaker Application –(Flutter, Firebase)

It has basic features of user login and signup. The user can create a quiz, whose data will be stored in firebase, and can play it.
