Experience

Applied AI Consulting LLP |Pune, MH | July 2021-Present

PROJECT 1: DevOps-In- a- Box.

Description: DevOps-in-a-box is a DevOps accelerator that helps you transform into well-organized release events so that you can focus more on providing quality value without worrying about delays and rising costs. It offers reusable templates and a self-service model, allowing software engineers to build their pipelines and deploy them independently. This way it facilitates you to improve the reliability of delivery while reducing the deployment time from weeks to hours.

Methodology: Agile [Scrum meetings] & CI/CD

Responsibilities:

- Analyzing & validating the completeness of business requirements.
- worked on AWS Cognito for DevOps-in-a-box.
- Worked on React-JS for designing DevOps-in-a-box.
- Integrated material Ui for the look and fill
- End to end Unit testing for DevOps-in-a-box.
- Deploying Code on GitLab.
- Coordinating with various teams such as DEV, QA, Performance, and DB support teams in case of any critical issues reported.

Applied AI Consulting LLP |Pune, MH | July 2021-Present

PROJECT 2: marXeed.

Description: marXeed is an intelligent marketing content data recommendation engine. It helps you with content marketing driven by the power of AI to create meaningful content to attract, engage, and delight your customers. Right from assisting you to find the best keywords to the off-page promotion and email marketing, marXeed is the holy grail for all your content marketing needs.

Responsibilities:

- Analyzing & validating the completeness of business requirements.
- API Integration in marXeed
- Designing a few components from Scratch using React-JS & Redux.
- material Ui design for Looks and fill
- end to end Unit testing
- Coordinating with various teams such as DEV, QA, Performance, and DB support teams in case of any critical issues reported
