<https://in.linkedin.com/in/yagni-kadia-8645a7218>

I want to pursue my career in web development with the latest technologies that are being used by the industry. I find new technologies more intriguing and want to explore more and more into it. I am a quick learner and have decent amount of hands on experience with React.

## Professional Experience

**Jr. React Developer** Simplior Technologies June 2022 - Present

HTML, CSS, ReactJS, Redux, GraphQL, AWS, NodeJS, AWS Lambda, AWS AppSync, AWS DynamoDB, AWS Amplify, Razorpay Integration

**React Trainee** Simplior Technologies March 2022 - May 2022

HTML, CSS, ReactJS, Redux, GraphQL, Styled Components, TypeScript, NextJS, Firebase, MongoDB

## Education

**Bachelors of Engineering** July 2019 - May 2022

Information Technology

Silver Oak College of Engineering and Technology

**Diploma Engineering** August 2016 - May 2019

Information Technology

Government Polytechnic for Girls

## Projects

Emplify:

- This is the main project on which i worked on during my previous job. It is an HRMS project made using ReactJS, Redux, GraphQL, AWS Amplify, Razorpay Integration
- There are many modules such as perks, time attendance, leaves, blogs, announcements, recognitions, OKR, 1-on-1, checking in/out, etc.
- AWS Amplify is used to manage backend services like Cognito user pools, lambda functions, GraphQL APIs using AWS AppSync
- I have made payment integration of razorpay fully functional from Frontend(ReactJS) and Backend (NodeJS on AWS Lambda)
- I have also integrated slack's API, which is used for sending notifications to employees on slack.
- Worked on BugFixing and solved majority of bugs in every modules.

## Key Skills

- HTML
- CSS
- JavaScript
- ReactJS
- Redux
- GraphQL
- AWS Lambda
- AWS DynamoDB
- AWS AppSync
- NodeJS
- ExpressJS
