Personal Projects

Own City (Shopping App)

- In this project I have used java language for back-end and xml for front-end to create attractive ui for the mobile app.
- Retrofit library has been used to integrate the Api.
- Api was developed in PHP using MySQL Database.
- Also Integrated third party library like: Track location using google map, etc.

RememberMe (Online Photographer Booking App)

- In this project I have used java language for back-end and xml for front-end to create attractive ui for the mobile app.
- Retrofit library has been used to integrate the Api.
- Api was developed in PHP using MySQL Database.
- Also used different kind of animations as well as external layout files to make UI attractive.

SwipeUp (Social Media App)

- In this project I have used java language for back-end and xml for front-end to create attractive ui for the mobile app.
- Retrofit library has been used to integrate the Api.
- Also Integrated third party library like: WebRtc, Google Signin, etc.
- Also worked on editing features of text, images, etc.
