Ahmedabad

Nov 2022 - Current

- **EQL Trading & Investing: (Currently Live on Android and iOS):**

- One of my most recent projects was the EQL Trading and Investing app. As the lead developer on this project, I was responsible for updating the entire UI, improving the app's performance, and enhancing the graphs to provide users with more informative data. Through this project, I gained valuable experience in trading and investing app development.
- Through my work on EQL Trading and Investing, I gained valuable experience in developing trading and investing apps. I learned how to create engaging and intuitive user interfaces, optimize app performance, and integrate real-time data.
- Through these projects, I have developed expertise in a range of areas, including UI design, app optimization, database integration, and real-time data analysis. I pride myself on my ability to take on complex projects and deliver high-quality results on time and within budget.
- I have also worked on several other app development projects, including a fitness app that helps users track their workouts and progress.
  - **Android:**
    - <https://play.google.com/store/apps/details?id=com.iu.eql.eql&pli=1>
  - **iOS:**
    - <https://apps.apple.com/se/app/eql/id1636441739>

- **Monast Alfmr: :**

- One of my On going project in this organization. As a lead developer on this project, I created authentication flow with 2 steps Login like Login via Creds, Login Via OTP and 2 step registration like registration with company document scanner and filled auto info on registration flow with robust UI design.
- Also Complete 4 step registration with robust API management using GetX state management.
- I personally learnt many things with different approach in this projects like API Integration, follows Business Logic Component Arch. & GetX Arch, Multi-Language Support & Multi -Theme Support Integration, Permission Handling & Service Handling Integration, Camera Capture, Mic. Record, Gallery and File Picker Integration, Local Notification as well as Push Notification Integration, Firebase Integration (Auth, Analytics, Crashlytics, RDB, AdMob, App Check), URL passing & Maps Integration, Location, Weather, Forecast, Air Quality Index Level Integration

---

- **Pharmasmart:**

- One of my most recent projects was the Pharmsmart app. As the lead developer on this project, I was responsible for updating the entire UI, and adding some features like authentication with QR code, store details of pharmacist Clock in-out with reasons and manage flow of that.
- Reading & Writing Health Data from/to Apple Health & Google Fit,
- I have also worked on several other app development projects, including a fitness app that helps users track their workouts and progress.

---
