FORKIFY WEBAPPLICATION | [LINK](#)

HTML5, SCSS, JavaScript, WebPack, NPM

Forkify is a Web Application that interacts with the Forkify API to fetch and display recipe food data.

This app uses modern JavaScript tools, such as Webpack to bundle the modules

The user can search for a specific recipe, and save it to a favorites list via local storage

The user can easily increase or decrease servings as per his need and can view detailed directions.

GIT_PROFILE_FINDER

HTML, CSS, JavaScript, GitAPI

Using this Web Application we can simply find the user's profile related to all information like how many he has Followers, and how many peoples are following them

And how many repositories he created and the number of stars etc
