Dear Sir,

I am writing to express my interest in joining your esteemed organization as an IT professional. My previous experience has been in a different industry, and I am now looking to switch careers to pursue my passion for information technology.

Although I have worked in a different industry, I have always been fascinated by technology and its potential to revolutionize the way we live and work. With the rapid growth of technology, I believe that the IT industry is where I can make a valuable contribution and also grow professionally.

To pursue my passion for IT, I have invested my personal time to learn programming languages such as HTML, CSS, Python, Java Script, React Js, Express Js, Node Js and SQL, and gained hands-on experience working on various projects. In addition, I have also earned several industry-recognized certifications to strengthen my technical knowledge and skills.

In my previous roles, I have demonstrated my ability to learn quickly, work under pressure, and collaborate with cross-functional teams. I have also developed excellent communication skills, which I believe is essential in any work environment, especially in IT where clear communication is vital for successful project outcomes.

Thank you for considering my application. I look forward to discussing my qualifications further.

Sincerely,  
Sai Murali

## OBJECTIVE

To obtain a challenging role as a Frontend Developer in a reputable organization, where I can apply my skills and knowledge in building responsive and interactive websites and web applications.

## SKILLS

- Proficient in HTML, CSS, JavaScript, React Js, Express js, Node Js, Python and SQL.
- Experience in developing responsive web designs using Bootstrap and other CSS frameworks.
- Familiarity with popular frontend library and framework like ReactJs and React Hooks.
- Good understanding of web development concepts and principles, such as RESTful APIs and JSON.
- Knowledge of version control tools like Git, Git hub.
- Strong problem-solving and analytical skills.
- Can create website using Figma tool.

## PROJECTS

- **Movies App (Netflix/Amazon Prime Clone) ([saimovienclone.ccbp.tech](https://saimovienclone.ccbp.tech))**  
Implemented responsive OTT platform app like Netflix/Amazon Clone where users can see movies like popular, trending, top-rated, and also can search movies and view specific movie details.
  - Implemented different routes for features like login, home, popular, profile by using React Router components Route, Switch, Link.
  - Implemented horizontal scrolling (In trending, top-rated, and originals sections) using React Third Party library called React Slick.
  - Used Figma mockups to implement UI-rich and pixel-perfect React components.
  - Explored open-source APIs for movies database and picked TMDB APIs for authentication, movies by category, and movie search APIs.
  - Implemented username and password authentication and persisted login state using client storage.
  - Implemented a protected route to ensure only authenticated users can access the pages like user profile, movies by category, etc.

**Technologies used :** HTML, CSS, JavaScript, React JS, Bootstrap, React Slick, Figma, client storage.
- **Nxt Watch ([saiwatch.ccbp.tech](https://saiwatch.ccbp.tech))**  
Implemented Nxt Watch application which is a clone for YouTube where users can log in and can see a list of videos like Trending, Gaming, Saved videos, and also can search videos and view specific video details, and users can toggle the theme (Light/Dark).
  - Implemented Different pages like Login, Home, Trending, Gaming, Saved videos using React components, props, state, lists, event handlers, form inputs.
  - Authenticating by taking username, password and doing login post HTTP API Call.
  - Persisted user login state by keeping jwt token in local storage, Sending it in headers of further API calls to authorize the user.
  - Implemented different routes for Login, Home, Trending, Gaming, Saved videos, Video item details pages by using React Router components Route, Switch, Link.
  - Redirecting to the login page if the user tries to open Home, Trending,

Gaming, Saved videos, Video item details routes which need authentication by implementing protected Route.

**Technologies used** : React JS, JS, CSS, Bootstrap, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication

- **Todos Application (saimtodo.ccbp.tech)**

Developed persistent todo application with CRUD operations to track list of tasks

- Displayed list of todos with HTML list elements, styled todo list using CSS, Bootstrap
- Implemented todo crud operations by using JavaScript event listeners and updated UI dynamically by using JavaScript DOM operations.
- Used Arrays, Objects and their methods during todolist CRUD Operations, Persisted todo list state on page reloads using local storage methods.

**Technologies used** : HTML, CSS, JS, Bootstrap.

## EDUCATION

- **VKR AND VNB POLYTECHNIC**  
2017  
Diploma in Mechanical Engineering

## EXPERIENCE

- **NHK Spring Ltd**  
17-09-2021 - 23-03-2022  
Production Engineer
  - Making production reports.
  - kaizen activities.
  - Achieving daily targets of production.
  - Line management of processes
  - Responsible for producing good quality products.
  - Allocating the man power to workplaces.
  - Maintaining good working environment.
  - Responsible for 5s.

- **Kisankraft limited**

*12-04-2021 - 14-09-2021*

Manufacturing Technician

- Press machine operations
- Responsible for producing good quality products
- Achieving daily targets of production.
- Maintaining good working environment.
- Responsible for 5s

- **Kia motors India**

*01-07-2019 - 04-03-2021*

Company trainee

- Done operations with 5400CTS4 Press M/C.
- Responsibility of Making a Quality Product.
- Finding defects dents&bumps.

- **Wipro Infrastructure Engineering**

*11-12-2017 - 29-06-2019*

DET

- Making good quality products on CNC turning machine.
- Checking quality of products.
- Making assembly of escalator cylinder.
