PROJECTS

1. Yellow Class LMS Software (Greet Labs Pvt Ltd)

The Project intends to develop entertainment, activity and hobby classes for kids. It allows parents to login and allow their kids for the class and take part in various competition programs, fun activities etc. Parents can also showcase their kid's activities to the YC team.

2. BlackPepper Website and Application (Greet Labs Pvt Ltd)

The Project intends to implement the idea submitted by the customer if the idea is commercially viable. The idea submitted by the customer is evaluated by the Pepper Council and will be provided portal login and temporary digital ID. If the idea is accepted the temporary ID changes to permanent ID using which users can track its progress.

3. All Graphs Portal Project (Infiniti Research Pvt Ltd)

The Project intends to provide users with access to various types of graphs and information provided in them using Flourish with various functionality like adding to favorite or providing filters according to various fields and saving them. Also the users are provided with accessibility according to the package they are using which was implemented with the Stripe Payment Gateway.

4. Infiniti Central Portal Project (Infiniti Research Pvt Ltd)

The Project is developed to manage and have knowledge on the various projects and products being managed by the organization which includes keeping track of the progress of the projects and managing it with various accessibility varying with client user and client Admin both with different modules.
