## EDUCATION

### B.TECH Computer Science

Delhi Technical Campus, Greater Noida

08/2018 - 06/2022

Greater Noida, Uttar pradesh

### 12th Science, DAV Narela

DAV CPS, Narela 110040

04/2016 - 04/2018

## WORK EXPERIENCE

### Flutter Developer

Antino Labs Private Limited

07/2022 - 06/2023

IT services and consulting company

*Achievements/Tasks*

- Managed a project with with team of 4 - 5 people, achieved fast app start time with efficient data handling and caching, made responsive layouts for app and web platform.
- Implemented media posting on multiple social accounts with login in flutter app with the help of appLink and deeplink in app for dynamic routing from outside the app.
- Facilitated and led daily Scrum meetings as scrum master within the company, ensuring effective communication and collaboration among team members.

### Flutter Developer, Internship

Touchstone Foundation, ISKON Bangalore

04/2021 - 08/2021

*Achievements/Tasks*

- Actively worked in an agile software development environment which utilized the Scrum process.
- Build custom audio player with playlist and live lyrics from api synced with audio runtime. Solved problem of dynamic playlist separated by different tags on a different screen synced locally with effective state management.
- Worked on pdf magazine download in base64 with http stream and offline view of encrypted stored pdf files.
- Worked with Firebase, Firestore, Storage, Auth, and remote config and with s3 and implemented other firebase services.

## SKILLS

Flutter App Development

Dart

Javascript

Python

Data structure and Algorithms

Git & Github

Figma/Adobe XD

HTML/CSS

SQLite

Kotlin

## PERSONAL PROJECTS

Also visualizers, Path finder visualizer in React Js [↗](#)

- A visualizers for the N-queens problem, balancer Knight's tour, and path finding algorithms (BFS, DFS, and Dijkstra's algorithm).
- These visualizers allow you to see the step-by-step processes and provide a graphical representation of the problems being solved.

Home automation with Node MCU with an Android app.

- Worked on Node MCU esp8266 module and used WebSocket to connect the device to app through common wifi router or with websocket server for remote access.
- Build different layouts for different devices working like fans, curtains, RGB lights, etc.

E-Grocery Flutter App with ExpressJs Backend and GraphQL Query database.

- Created a flutter app with provider state management, used Nexus GraphQL with Postgres for Database and node Js for the backend.
- Build Product Management web app in Nextjs to add product and manage inventory.
- Implemented AWS S3 for product image storage and firebase for auth.

## TECH STACKS

Flutter & Dart

*Full Professional Proficiency*

Python

*Professional Working Proficiency*

Javascript/Typescript

*Professional Working Proficiency*

ReactJs

*Professional Working Proficiency*
