WORK EXPERIENCE

Information Analyst

DXC Technology

08/2020 - 11/2022

Bengaluru

Achievements/Tasks

- Part of the US Health Care project - Meta Vance, where I carried out the role of a front-end developer in an agile environment.
- Developed the Front End using HTML, CSS, JavaScript, Angular, and JQuery.
- Python Scripting for executing the functionality of API and Batch jobs.
- Designed and executed manual test cases for the CITRIX application, including regression, integration, and end-to-end testing.
- Worked on Defect Recreation, fixing the Defect in code, and Final Testing of the Defect.

ACHIVEMENTS

Won Collaborator Award twice and Q2 FY22 DXC Champ Award in DXC Technology (10/2021 - 07/2022)

For Contributing significantly on Completing the assigned task as per Client satisfaction and delivering on time.

GATE -2022 and GATE -2023 qualified

PERSONAL PROJECTS

Flipkart-UI-Shopping-Cart-project (05/2023 - 05/2023)

- This is a flipcart UI where I try making add to cart feature in angular.

Spotify clone (using JavaScript) (04/2023 - 04/2023)

- is a web application just like another music player which allows users to play & pause songs of their own, made with HTML, CSS Javascript connectivity.

My Browser Extension(using JavaScript) (04/2023 - 04/2023)

- It is a type of extension for Chrome just like another extension which fetches random jokes data from the API key in JSON format and pop-ups to the screen in the browser, built using JS.
