## WORK EXPERIENCE

### Backend Developer (Sr. Software Engineer) Q3 Technologies

05/2022 - 02/2023  
www.q3tech.com

Gurugram

#### Responsibilities/Tasks

- Developed APIs and enhanced multiple modules for 'Hero MotoCorp' product named 'Freedo Rentals'.
- Implemented the SOLACE (for EDA) and developed multiple PubSub for the app Freedo.
- Implemented Razorpay PG and handled the existing PGs on the running payment management system in Freedo.
- Developed Phase-1 modules for the NIIT product named 'Digital Tools' and did R&D, Project Setup for the initial requirements of the product.

### Backend Developer (Consultant - SE) Datamatics

07/2021 - 05/2022  
https://www.datamatics.com/

Bangalore

#### Responsibilities/Tasks

- Maintain and enhance a 'Authentication Microservice' single handedly. It is used in the IDFC bank project for complete authentication purpose. It works as a plugin and can be consumed in different modules or microservices of the project.
- 'Auth Microservice' consists multiple auth mechanisms & several features for providing a complete authentication to all other modules & microservices of the project.
- Part of the backend team for the IDFC Collection App which has multiple microservices. Develop and debug some small tasks for this app.

### Full Stack Developer (Deputy Manager) Star Agribazaar Technology Ltd

12/2018 - 07/2021  
https://www.agribazaar.com

Noida

#### Responsibilities/Tasks

- Lead developer for registration and onboarding Module named 'CRF'. In this, I developed a complete (front+back+DB+server) big onboarding module that contains multiple sub-modules like CRF, ARF, Self-registration, FRF, Panel for the business team, etc. Also, Maintain & Enhance this regularly.
- Developed this CRF on a separate server/DB/codebase and integrated it with other multiple modules of 'Agribazaar Product' which are on a different server/DB/codebase.
- Integrated multiple 3rd party APIs for implementing features like bank-account verification, user e-KYC, payment wallet, user communication, Pincode details, IFSC details, etc, and also collaborated with respective service providers like AuthBridge, Nupay, MSG91, etc for integration.
- Developed some other small modules named 'employee panel', 'admin-module-permission(AMP) panel', 'view users panel'.
- Transferred, successfully, this big module 'CRF' from one platform 'fasttrack' to the other platform 'Agribazaar' completely and merged the Real DBs in a very short time & also single-handedly.
- Upgrade and repaired the existing 'permission' module (crucial module) having no information about flow/business-logic, into a well-developed module.
