

Chandrakant Sangale

SOFTWARE ENGINEER | REACT JS DEVELOPER

Pune | 8055230393 | csangale.work@gmail.com | sangale.me

OBJECTIVE

Seeking a challenging role as a **React Developer** to leverage my **4+ years** of experience and technical expertise in building robust and user-centric web applications. Looking to join a dynamic team where I can further enhance my skills, collaborate with cross-functional teams, and continuously learn and grow in the field of development.

SUMMARY

- Results-oriented **React JS - Software Developer** with **4.4 years** of experience
- Having extensive experience and exposure to UI development using **React JS, Bootstrap, HTML5, CSS3, React Hooks, Redux, Redux-thunk, React Router, Redux-Toolkit, Redux-Saga, Typescript**.
- Basic understanding of Back-end tech. like **Node.js** and its framework **Express JS**.
- Knowledge of using NoSQL database like **Mongo DB** and **Atlas** (cloud database service).
- Proficient in state management libraries like **Redux** and **Redux-Toolkit**, ensuring efficient data flow and seamless application performance.
- Building **responsive UI** using **CSS media queries, flexbox, grid, and Bootstrap**. Also used **CSS preprocessors** like **SASS / SCSS**.
- Knowledge of using existing component-based frameworks like **Material UI**.
- Skilled in **optimising application performance** by implementing performance tuning techniques, code splitting, lazy loading, and various other techniques.
- Strong understanding of **RESTful APIs**, integrating them into applications to enable seamless communication with back-end systems.
- Familiarity with build tools and automation processes, including **Webpack, Babel**, and **CI/CD** pipelines.
- Well-versed in testing methodologies such as **unit testing**, utilising frameworks like **Jest** and **RTL**.
- Good knowledge of **version control systems** like **Git** and **GitHub**, and familiar with **AWS** services like **EC2**.
- Working under **Agile methodology, Scrum** with **JIRA**.
- Demonstrated problem-solving skills, efficiently and effectively identifying and resolving complex technical issues. Excellent collaboration and communication abilities.
- Proactive in staying up to date with the latest industry trends and advancements in React development, continuously expanding knowledge and skills.

EDUCATION

Bachelor Of Computer Application From Pune University

WORK EXPERIENCE

Influxarena Technologies

2019 - Current

Software Engineer

SKILLS

HTML & CSS

Javascript

React JS

Typescript

Node JS & Express JS

SCSS / SASS

Bootstrap / Material UI

Git / Github

Agile Development / Jira

Jest / RTL

Figma

RestFul APIs

SKILLS

HTML & CSS	JavaScript
ReactJS	TypeScript
NodeJS & ExpressJS	MongoDB
SCSS / SASS	Bootstrap
MaterialUI	Git/GitHub
Agile Methodology / JIRA	JEST & RTL
Figma	RestFul API's

PROJECT EXPERIENCE

Project 3

Project Name: Qantas

Description: Qantas Freight, a subsidiary of Qantas, handles vital air cargo operations for the Qantas group. Qantas Freight's partnerships, including Australian airExpress and StarTrack, demonstrate its commitment to seamless package delivery and road freight services.

Roles and Responsibilities:

- Develop and maintain user interfaces for revenue management systems using **React.js**, **HTML**, **CSS**, and **Javascript**, ensuring efficient and user-friendly experiences with a component-based architecture.
- Implementation of connectivity with API services by using **Axios / Fetch**.
- Collaborate with cross-functional teams to understand requirements and translate them into technical solutions, utilizing tools like **JIRA** for project management.
- Implement responsive designs and optimize UI performance using CSS frameworks like **Material-UI** to enhance revenue management processes' efficiency.
- Integrate with backend APIs and services, utilizing technologies like **RESTful APIs** to fetch and update data for cargo bookings, capacity management, and revenue optimization.
- Write clean and maintainable code, following best practices and participating in code reviews using tools like **Git** and **Github**.
- Conduct thorough **testing** and **debugging** of UI components using testing frameworks like **Jest**, ensuring a stable and reliable revenue management system.
- Collaborate with stakeholders to gather feedback, understand user requirements, and iterate on UI designs and features for continuous system improvement using prototyping tools like **Figma**.
- Provide technical guidance and support to junior developers, fostering a collaborative and learning environment.

Project 2

Project Name: Associated Biotech

Description: Associated Biotech, with 16 years of successful operation and WHO GMP certification, offers Third Party Manufacturing for Cephalosporins, Non-Beta Lactum, Beta Lactum, and Nutraceuticals. They provide a wide range of products, including Tablets, Capsules, Dry Syrups, and Ready To Fill Granules.

Roles and Responsibilities:

- Developed and maintained the user interface using **React.js**, **HTML**, **CSS**, and **JavaScript**, leveraging front-end development best practices.
- Implemented responsive designs, optimised performance, and ensured compatibility across devices using CSS frameworks.
- Integrated with backend APIs using **REST APIs** for seamless data flow.
- Wrote clean and maintainable code following coding standards, conducted testing, and participated in code reviews.
- Provided technical support, shared knowledge, and ensured timely project delivery.
- Technologies used: **React.js**, **HTML**, **CSS**, **Javascript**, **RESTful APIs**, **JIRA**, **Bootstrap**, **Git**, and prototyping tools (**Figma**).

Project 1

Project Name: Wehkamp

Description: wehkamp.nl: Leading online department store in the Netherlands with 1.7 million customers, 122 million annual visitors, and 7 million shipments. Market leader in online shopping, offering a versatile range of 180,000+ products across various categories. Achieved record turnover of 590 million euros

Roles and Responsibilities:

- Developed and maintained the sellers dashboard using **React.js**, **HTML**, **CSS**, and **JavaScript**.
- Collaborated with the backend team to integrate frontend components and ensure smooth data flow.
- Implemented responsive design and optimised UI performance using CSS frameworks like **Bootstrap**.
- Wrote clean code, participated in code reviews, and conducted thorough testing and debugging.
