Projects

Weather App

Solo 1 MEMBER IN TEAM AND COMPLETE IN 1 MONTHS

- The Weather App is a simple project developed using JavaScript, CSS, and HTML and Express JS. In the Back-end we use Express JS technology as a server side. This project is an interesting project for simply weather forecasting. The user can check the condition of the present-day climate probability and predict whether the day is a cloudy or sunny day by entering different city Dynamically.

PizzaHut

Login & Signup API Development

5 MEMBER IN TEAM AND COMPLETE IN 2 MONTHS

- In PizzaHut Back-end we use Node JS, Express JS, MongoDB technology and Mongoose to provide the complete RESTful API. We use Node JS for generating validation hash code and JWT token. And added user validations & user permissions by using Node JS.

- PizzaHut is a service in which a pizzeria or pizza chain delivers a pizza to a customer. Pizza Hut service is somewhat similar to courier service in which the ordered food is delivered from the its own restaurant to the customer by the restaurant'
