## EXPERIENCE

**Solution Analysts, Ahmedabad — Junior Software Eng.**

19/01/2022 - Present

**Swear Web-App Technology, Vadodara — Intern.**

01/07/2021 - 06/01/2022\

## PROJECTS

**Fine Tech — Frontend**

- Improved the performance of the website by 75% by reducing the bug ratio and optimizing the code.
- Integrated state management library which improved speed by 80% and increased the reliability of the transaction process.
- Increased client satisfaction by working on feedback and understanding queries.

**Event Management System — Full Stack**

- Improve the calling and chatting features by optimizing the implementation of the socket and agora library.
- Analyzed the build time using different tools and reduced the overall build time from 5 minutes to 2 minutes by optimizing the code.
- Optimized database queries to reduce the response time of the API calls.

**Data Entry Bot — Robotic Process Automation**

- Create a bot using Electorpeek software which enters the data into the client's record-maintaining system which reduces time and effort by 60%.

**In-House POCs — AI/ML & RPA**

- Create a bot for the sale team which generate leads from LinkedIn at a particular time and target search.
- Implement tensorflow js library for AI/ML which runs the already trained model into node js framework.
