## Skills

## Profile

Results-driven Associate Software Developer with almost 2 years of experience in the field. Motivated to devise forward-thinking solutions to meet current and future needs.

## Employment History

### Associate Software Developer, Talview, Bangalore

JUNE 2021 – PRESENT

- Developed assessment engine and question bank management. Built the project from scratch and implemented GitHub actions for deployment and docker to manage applications to work efficiently in different environments.
- Developed Question Parser to bulk import questions for assessment and was able to reduce 50% the effort of the technical support team.
- Worked with team to split data storage into AWS and Azure based on different regions and demands of clients hence contributing to increasing the usability of the product.
- Developed cron based email reminder feature.
- Configured and optimized code to fit design parameters.
- Documented technical workflows and knowledge to educate newly hired employees.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Developed and maintained program and system documentation.
- Trained interns with the current stack being used in projects.

### Intern, Software Engineering Research Center - IIITH, Hyderabad

AUGUST 2020 – SEPTEMBER 2020

- Created Dynamic Webpage.
- Explored new technologies and approaches to streamline processes.
