SKILLS

React JS

JavaScript

HTML/HTML5

CSS/CSS3

Redux JS

BootStrap

C++

React-Hooks

PROJECTS

Netflix Clone

- Building a great UI experience through Material UI (Icons).
- With the help of React js built a single-page application without refreshing the whole website.
- Showing the dynamic data to the user through IMDB APIs, with the help of AXIOS.
- React Hooks is used for managing the states of different pages.

LinkedIn Clone

- Using Redux management for writing applications that behave consistently, run in different environments (client, server, and native), and are easy to test.
- Uses of Material UI (Icons) for experiencing a great UI experience.
- Form Handling is used in the application to create a post in the feed section.
- Firebase is used for social authentication and Firestore is for the database.

Realtime Chat Application

- To supply the browser with an asynchronous URL that corresponds to the data that will show on the web page, we have used Routing.
- React Context APIs are used to pass data through our component trees, giving our components the ability to communicate and share data at different levels.
- For making chat services we have used Chat Engine APIs.
- Firebase is used for social authentication and Firestore is for the database.

E-Shop Application

- Add to cart option with the help of React Hooks.
- Uses of Material UI (Icons) for experiencing a great UI experience.
