EXPERIENCE

Brigosha Technology, Associate Software Engineer (Backend Developer) December-2022- present Bangalore

- As a backend developer, I was responsible for designing and implementing the API, as well as integrating it with the website's database and front-end interface.
- The API was developed using Node.js and Nest.js framework. I used PostgreSQL as the database and typeORM communicate with the database. The API was also secured using JWT authentication and deployed to a cloud-based server.

FunctionUp, Backend Developer Trainee & Teaching Assistant March 2022- Sept-2022 (8 Months):

- Trained in Backend Development using Node.js with Express and MongoDB
- Familiar with AWS S3, SQL, React.
- Skilled in teamwork, owning tasks, and timely deliveries.
- As a Teaching Assistant, helped new trainees with DSA and project-related doubts.

Nvidia Graphics Pvt.Ltd, Process Executive

April 2021- Sept 2022 (1 Year 6 Months):

- Label on object This information can include specifics on people, locations, objects, and more.
- Quality assurance
- Detecting Object Labels.
