POOJA POWAR

REACT FRONT-END DEVELOPER

CAREER OBJECTIVE :

- React front-end developer with 2 years of experience building web applications using React JS and modern JavaScript tools/frameworks.
- Collaborated with backend developers to execute new features and create API endpoint request/response payloads.

WORK EXPERIENCE :

Czar Vision Technology Solutions, Pune

May 2021 – Present

Jr. FRONT-END DEVELOPER

Project 1

Title: M-ERP

Technology: React JS, Redux, React-Router-Dom, Axios, React-Query, Express JS, MySQL.

Description :

- Developed an ERP business application for operational management, and supply chain encompassing manufacturing, analytical testing, sourcing, marketing & distribution capabilities in Pharmaceuticals, Nutraceuticals, and Cosmeceuticals.
- Users like administrators, health professionals, doctors, and users were handled.
- Functional requirements such as creating user accounts, log-in into accounts, daily as well as Weekly updating can be done, accessing products online, and overall transaction details for the administrator, were implemented.
- Project includes modules like Product, Purchase, Sales, Stock, Depot, Operations Management, etc.
- We have used React JS for the front end, MySQL for the back end And Node JS with Express JS for creating API at middleware.

Responsibilities:

- I have worked on application layout design.
- I have worked on login forms for admin and users.
- Implemented fetching/posting resource data from/to the server using asynchronous API calls.
- Created API endpoints for the server to get/post resource data from the database.
- I have worked on Mailing and Reporting module in the application.
- I have worked on optimizing the application's performance.

PERSONAL INTERESTS :

Playing,
Music listening and singing,
Gardening

PERSONAL INFORMATION :

- **Birthday**
June 17, 1997
- **Gender**
Female
- **Marital Status**
married
- **Name**
Pooja Suresh Powar
- **Nationality**
Indian

LANGUAGES :

English
Hindi
Marathi

Project 2

Title: Notification-Scheduler

Technology: Node JS, Express JS, Node-Scheduler, Nodemailer, Web-Push, xlsx, MySQL.

Description :

- Developed a Notification scheduler application for the Pharmaceuticals, Nutraceuticals, and Cosmeceuticals manufacturing industry's stock updates to the administrator.
- Functional requirements like notifications for the daily stock update, daily order reports, daily payment reports, and daily delivery reports were implemented.
- The headline feature of the application was, it gives a notification to the administrator if the minimum stock quantity reaches.
- MySQL was used for the back end.
- Node JS and Express JS were used for the middleware.

Responsibilities :

- Implemented a system where automatic notification was sent to the administrator if minimum stock quantity reaches.
- I have worked on mailing daily stock updates to the administrator.
- I have worked on generating daily order reports, payment reports, and delivery reports from the database.
- I have worked on mailing daily reports to the administrator.

DECLARATION :

I hereby declare that the above information is correct up to best of my knowledge. And I here the responsibility for the correctness of above mention particular..

Place : **Pune**
