WORK EXPERIENCE

SOFTWARE ENGINEER

Lucent innovation - Ahmedabad, Gujarat | Dec 2020 - present

- Fulfilling the **team lead** role on various challenging projects, which involves communications with both **onshore & offshore clients**.
- Trained multiple freshers to enhance their skills in front end & Shopify development.
- Worked as a dedicated developer for renowned brands such as **The Man Company, Nicobar** and many more.
- Utilized the Shopify platform to develop full-fledged E-commerce websites.
- Awarded **Employee of the Month** and received **Best Team player** award.

PROJECT DETAILS

Nicobar

- Designed account pages of Nicobar using **ReactJs & Redux**, which involves user's details such as their addresses, past orders, account credentials etc., fetched using **Redux-Saga** from custom Nicobar API endpoints.
- Integrated a **Google One tap signup** functionality where on just one click user will login to the website by their email Id.
- Developed **pin code based express delivery** functionality where based on user pin code user will get to know when product will be delivered on their location just like MYNTRA and other shopping app's express delivery feature.

The Man Company

- Built discount code apply functionality in cart page and collection page filter using **React, Redux-Saga** and **GraphQL** query.
- Worked on **Formik** and **Yup** library for validating form.
- Designed a Product recommendation section, product image slider using swiper slider.

Good Earth

- Designed various module using **Material UI** library.
- Worked on cart page shipping charges and discounts based on multi tier.
- My work involved collaborating with the design team to ensure that the visual elements of the application were consistent with the **Figma**.
- Built checkout page gift card and promo code apply functionality using **React, Redux, Typescript** and **React Query**.

SKILLS

- Library:** ReactJs
- Framework:** NextJs
- Web Development:** JavaScript, Typescript, HTML5, CSS3, Bootstrap4, JQuery, GraphQL.
- E-commerce Platform:** Shopify
- Version control:** GIT, Bit bucket
- Project Management:** Jira, Goodday
- Design Libraries:** Material UI
