

Pradip Bhusnar

FRONT-END DEVELOPER

As a frontend developer, I specialize in using ReactJS and NextJS frameworks to build high-performance, scalable web applications. I have a strong understanding of TypeScript and use it to write clean, maintainable code that's easy to debug. My skill set includes creating complex UI components, implementing state management using Redux, and optimizing web pages for faster load times. I am seeking senior-level opportunities to lead and mentor teams and drive innovation in web development.
