SAURABH KAUSHIK

2292 Housing Board Colony , Sector 4 , Rewari, Haryana ,
India 123401

OBJECTIVE

Experienced front-end developer seeking challenging role to utilize expertise in HTML, CSS, JavaScript and ReactJs. Committed to delivering exceptional user experiences, clean code, and cross-browser compatibility. Passionate about creating visually appealing interfaces and staying updated with industry trends for high-quality front-end solutions.

SKILLS

Languages

- HTML
- CSS
- Bootstrap/Tailwind
- Javascript (ES6)
- React js
- Material UI

Software/Technology

- Git
- Docker
- Jira
- ChatGPT
- Search Engine Optimization (SEO)
- Debugging

Soft Skills

- Problem Solving Skills
- Analytical Skills
- Decision Making Skills
- Emotional Intelligence
- Passionate, Innovative and Quick Learner

LANGUAGE

English

Hindi

EXPERIENCE

Rise11 Technologies

17/05/2021 -
Present

Entry-Level-Front-End Developer

- Developed and maintained responsive web applications using React.js, HTML5, CSS3, and JavaScript.
- Implemented efficient and reusable React components, following best practices and coding standards.
- Integrated third-party APIs to fetch and display data dynamically.
- Collaborated closely with designers and backend developers to ensure seamless integration of front-end and backend functionality.
- Conducted code reviews and provided constructive feedback to improve code quality and maintainability.
- Collaborated with the design team to translate wireframes and mockups into functional and visually appealing UI components.
- Worked closely with back-end developers to integrate front-end and back-end functionality.
- Optimized applications for performance and scalability, implementing techniques like code splitting and lazy loading.
- Assisted in improving the development workflow by implementing automation tools and streamlining processes.
- Actively participated in Agile development methodologies, attending daily stand-ups and contributing to sprint planning and retrospectives.

Gnap Services Pvt. Ltd.

21/07/2020 -
14/05/2021

Cost and Progress Executive

Client Name- Nokia Solutions and Networks

•Operations Team (WBS Closure Activity)
Worked on SAP P20 module, Worked on Creation & Closure of Vendor Order Agreement(VOA), Service Order(SvO), Sales Order(SO), Work breakdown structure(WBS), Goods Receipt creation, Goods Receipt reversal, Invoice creation & reversal, Worked on 4C tool, IPM tool, Prepared and download financial reports.

•NAM (North America) Team
Managed Email data over excel sheet, Updated NDPD Tool, Invoice generation, Client handling, Created SOP for different tasks and tools

EDUCATION

BM College of Technology and Management, Gurgaon

Passing Year - 2020

MBA IT and Finance

Grades : 7.8 CGPA

SMEC, Neemrana

Passing Year - 2014

B.Tech Electronics and Communication Engineering

Grades : 70.96 %

PROJECTS

Netflix Clone

The Netflix clone project aims to recreate the user interface and functionality of the popular streaming platform Netflix. It will allow users to browse and stream movies and TV shows, similar to the original Netflix website. TMDB API is used for all of the data and Firebase Authentication is used to give login functionality. The front-end is styled with Tailwind CSS - an incredible CSS framework to save time styling apps. The project is deployed Live with Firebase hosting.

Features:

1. User Authentication: Users will be able to create accounts, log in, and log out. Firebase Authentication will handle user authentication and secure access to the application.
2. Movie/TV Show Database: Firebase Realtime Database will be used to store and retrieve movie and TV show data. This data will include information like title, genre, description, image URL, and video URL.
3. Movie/TV Show Listing: The application will display a list of movies and TV shows fetched from the Firebase database. Users will be able to browse and search for content.
4. Movie/TV Show Details: When a user clicks on a movie or TV show, they will be redirected to a details page displaying additional information such as the synopsis, cast, and other relevant details.
5. User Watchlist: Users will have the ability to add movies or TV shows to their watchlist. This information will be stored in the Firebase database and can be accessed later.
6. Responsive Design: The application will be designed to be responsive, ensuring a seamless user experience across different devices, such as desktops, tablets, and mobile phones.

Weather App

The weather app project aims to provide users with current weather information for a given location. Users can enter a city or location, and the app will fetch and display the weather data for that location. Technologies used to develop the app are JavaScript, ReactJs, MUI and openweathermap API.

Features:

1. Location Search: Users can enter the name of a city or location in a search bar to retrieve weather data for that specific place.
2. Weather Display: The app will fetch weather data from a weather API using the Fetch API. It will display information such as temperature, humidity, wind speed, weather conditions, and any additional relevant data.
3. Icon and Background: The app can utilize weather icons and background images corresponding to the current weather conditions to enhance the visual representation of the weather data.
4. Responsive Design: The application will be designed using Material UI's responsive components, ensuring that the app adapts and functions well on different screen sizes and devices.

ACHIEVEMENTS & AWARDS

Responsive Web Design Certification by FreeCodeCamp

JavaScript Algorithms and Data Structures Certification by FreeCodeCamp

Scrum Foundation Professional Certificate (SFPC)

Certificate of Excellence in Python by Coding Ninja.

Secured Intra College 1st position in academic in B.Tech.

Secured Intra College 1st position in academic in MBA.

Secured 3rd position in Inter college Quiz Competition.
