Backend Developer

As a Backend developer, I have 3 years' experience in designing and developing scalable, Monolithic efficient applications. I have a deep understanding of various backend technologies and frameworks such as express.js, .net, , and I am well-versed in both SQL and NoSQL databases.

Throughout my career, I have worked on a variety of projects ranging from small startups to large enterprise applications. I have a strong understanding of system architecture, database design, and API development, and I am skilled in writing clean, maintainable, and testable code. I am also proficient in using tools such as Git, Heroku, Aws for continuous integration and deployment
