PROFILE

Experienced ReactJS developer with expertise in building scalable and responsive web applications using ReactJS library. Proficient in Redux, React Router, and React Hooks. Skilled in HTML, CSS and JavaScript. Strong problem-solving skills and ability to collaborate in an agile environment.

EXPERIENCE

System Engineer

Tata Consultancy Services

July 2019 - Current

Bangalore

- Total of four years of professional experience, with a specialization in front-end development utilizing React.js for a period of two years.
- Responsibilities included implementing user interfaces using React components, JSX syntax, and CSS frameworks, adding new features, bug-fixes and maintenance.

PROJECTS

- I contributed to the development of an internal web portal for GM. The portal served as a platform for employees to upload their models for analysis, incorporating features such as quality checks, reviews, and manual review capabilities. Additionally, the portal provided downloadable guidelines for subsystems.
- I independently developed a personal project, which is a comprehensive movie site. This platform enables users to search for any movie and access detailed information about it, including available trailers. Additionally, the site provides streaming information along with corresponding links for convenient access. Furthermore, it includes a watchlist feature, allowing users to add movies of interest to their personal watchlist for future reference and easy access.
