Agile Methodology	

Roles and Responsibility

UI Components Designing & Application Interface Coding

- Identified web-based user interactions and developed highly-responsive user interface components via React concepts.
- Translated designs & wireframes into high-quality code and wrote application interface code via JavaScript following React.js workflows.

Code Debugging & Front-end Architecture

- Troubleshoot interface software and debugged application codes to improve functionality and performance.
- Developed and implemented front-end architecture to support user interface concepts with accuracy.

Performance Optimization & Features Development

- Monitored and improved front-end performance and documented application changes & worked on updates.
- Developed the latest user-facing features using React.js and built reusable components & front-end libraries for future use.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.

Application Development & UI Designing

- Coordinated with the development team to discuss user interface ideas and applications.
- Reviewed application requirements and interface designs to ensure compatibility with existing applications.
