1-s-1 rc vyas colony, Bhilwara (Raj)

SKILLS

Hard Skills

- Software Testing
- Front-end Framing
- Asynchronous Programming
- Error-Handling
- Long Polling

Techniques:

- Package Management
- Web Application Frameworks
- Authentication

Architecture:

- Monolith
- Microservices

Languages:

- English (Native)
- Hindi (Native)
- Georgian (Conversational)

EDUCATION

BML Munjal University

Bachelor of engineering

67th Milestone, National Highway - 8
Sidhrawali, Gurugram, Haryana -122413
09/2014 - 09/2018

WORK EXPERIENCE

Node Js Developer

Ethereal Softech Pvt Ltd

2022/06 - current

- Developed and **managed** a **high-volume case management system** from scratch, effectively handling over 1,50,000 cases within a tight timeframe using **Node.js**.
- Integrated with **Android APIs** for efficient data management.
- Implemented **end-to-end security measures**, including **authentication**, **authorization**, and **data encryption**, to safeguard sensitive company member data within the custom-built case management project.
- Effectively accommodated the continuous increase in cases on a daily basis.
- Successfully implemented the **event-driven system** using **Kafka**, enabling **real-time processing** and **analysis of financial events**.
- Improved the overall system performance by **optimizing data pipelines** and **microservice communication**, resulting in **reduced latency** and **increased scalability**.
- Received **positive feedback** from stakeholders for delivering a **reliable and secure system** that met **strict regulatory requirements**.
- Actively contributed to the team's **collaborative** and **agile development** approach, resulting in **timely project completion** and **high-quality deliverables**.

Node Js Developer

Img Global Infotech

2022/04 - 2022/06

- Developed a user-friendly exam portal using **Node.js** and **MongoDB**, allowing teachers to create and manage questions and answers. Implemented **multiple-choice examination** functionality with features like **question randomization** and **result calculation**.
- Contributed to the development of a captivating fantasy cricket app, leveraging data **aggregation** from various APIs for real-time cricket updates. Implemented features such as **player selection**, **team creation**, and **scoring algorithms** using **RESTful APIs**.
- Built an e-commerce platform with secure payment integration using **Razor pay**. Developed core features like **product listing**, **shopping cart**, and **order processing** using **Node.js**, **Express**, **MongoDB**, and **AJAX**. Ensured a **seamless user experience**, **scalability**, and **security** by leveraging these technologies throughout the development process.
- Developed robust **RESTful APIs** for an audition project using **Node.js** and **Express**. Collaborated on **API definition** and **data validation**, ensuring **efficient communication** between components and seamless integration with client applications.

Previous Experience

Mechanical Engineer , Geosteel LLC , Rustavi, Georgia

06/2019 - 02/2022
