CAREER OBJECTIVE

I am currently looking for a Front-end Developer job opportunity that will allow me to work alongside an expert team of developers, there by helping to drive my career progression to more senior roles in the future.

I have a firm knowledge of HTML, CSS, and JavaScript language and possess a good knowledge of computer software packages (frameworks and tools) that are used in today's technology. I am a self-motivated, organized, and committed individual with the ability to work well independently or as part of a professional development team.

Work Experience

12/2021 – 01/2023
software developer

Projects

Extra Marks(react-native), learning app

extra marks isEdu tech company help the student to learn, practice and test their concept. extra marks also offer the learning material for competitive exams like JEE, NEET, and CUET. application made on **react-native**

Buyume(react-native), e-commerce app [↗](#)

it is an e-commerce app made for a branded beauty product. the end user gets the branded product at a low price this is because buyume does the cost-cutting of a middleman. it also follows the refer and earn model. this application is made on a **react-native** stack and I made this application from scratch.

Ev smart(React.js), *Electric Is an amazing source of fuel to run a Vehicle right. So why we are still buying petrol and diesel vehicle. Are we Totality unaware of Electric vehicle? No! It's just that there are rare availability of charging station to charge vehicle .So on EvSmart people who own charging station for personal use can offer their station to other people by using EvSmart app. station owner can make money if station engage by some another car Owner who already register on EvSmart app.* [↗](#)

Netflix clone(react.js) [↗](#)

Trying to achieve a Netflix clone. where user can watch all Netflix trailers at one this single web site which is built on react.js, with help of redux.js for the backend I used firebase, and for the movie Api, I used IMTB movie API. Users can get access all the trailers if a user is login.

Amazon clone(react.js)

Trying to make one e-com similar to amazon where users can create an account and login. application is on react.js with help of redux.js for state management. where the user adds the product to their basket and removes it from their basket and proceeds to checkout. where user also can manage their basket on the payment page.
