nginx

aws services

PROJECTS

Greenalytics ESG (07/2022 - 06/2023)

- This system is mainly for data analysis and prediction of data also generate SEBI report using that data of the particular financial year. In that 4 types of user.
- Whole application is deployed on aws and as per user requirement whole isolated your application is deployed on your specified aws region or if you want to use shared infrastructure than it is also available .
- My Role :- My role in this app is to work with front-end and backend as per modules. I had completely set up front-end in react from scratch with role-base routing. and also work with backend developer in some module of Sebi report and chart generation as per predicted and stored data .
- Technologies Used :- React JS , Node JS , AWS Services.

SmartFinDoc (01/2022 - 07/2022)

- This system is company's own product which is mainly based on document management for CA and associates. There are 4 Types of user's System admin, Admin (CA) , Staff (Staff of CA) , User (CA's client). System admin can manage ca and provide cloud storage on AWS s3 for upload document. CA can manage staff and its client.
- My Role:- My role in this app is to manage complete backend and also API integration using react. Add features as per requirement and handle deployment of backend and frontend on AWS.managemnt aws cloud storage and aws services.Currently, I am working on frontend(React JS) and backend(Node JS) both as per requirement.
- Technologies Used :- React JS , Node JS, React Native.

Dundee Recovery Road map , Earth Rising also have 2-3 projects on which i had worked on.
