01/2023 - 07/2023

Ahmedabad

#### Achievements/Tasks

- In this internship I have learned some of frontend technologies and approaches to solve the problems.
- I've learned about various Version control tools, database management tools and some API management tools.
- The Internship was all about first learning the basic of web development.
- I have learnt what are the problems a developer and the tem faces while working on a live project.
- **Technologies** : HTML, CSS, JavaScript, TypeScript, ReactJS, Redux, Redux Toolkit, Angular, Bootstrap, Tailwind CSS, Angular Matrieal.

## PERSONAL DETAILS

DOB : 09/02/2002

Gender : Male

Nationality : Indian

Religion : Hindu

## SKILLS

HTML

CSS

JavaScript

TypeScript

ReactJS

Redux

Redux Toolkit

Angular

OOPS

Git

GitHub

## PERSONAL PROJECTS

### Password Generator (JavaScript)

- **Objective** : Create a user-friendly password generator using HTML, CSS, and JavaScript.
- **Customization** : Users can choose password content (uppercase, lowercase, numbers, symbols) via checkboxes. JavaScript generates a random password based on selected criteria.
- Option to copy the generated password with one click.
- [GitHub Repo Live Demo](#)

### Notes App (JavaScript)

- **Objective** : Create a responsive notes app using HTML, CSS (Bootstrap), and JavaScript.
- **Features** : Users can add, delete, and search notes for efficient management with a search feature to find specific notes quickly. The app is fully responsive. Notes are securely stored using browser's local storage for data persistence.
- [GitHhub Repo Live Demo](#)

### Personal Portfolio (React JS)

- **Objective** : A simple portfolio built using ReactJS, utilizing React Router hooks for state management in functional components.
- The portfolio is hosted on Netlify, ensuring easy access and smooth deployment. The portfolio consists of a single-page application with separate pages for showcasing projects and skills.
- [GitHub Repo Live Demo](#)
