## Skills

---

- iOS | Swift | Flutter | Dart | Android | Java | Debugging
- UI Kit | Swift UI | Core Data | FCM | Google Maps | Apple Pay | GetX | Riverpod | Provider | Method Channel | OOP |
- Jira | Click Up | Proof Hub | Unit Testing | Gitlab | Bitbucket | GitHub
- Xcode | Android Studio | Post Man | Source Tree | Slack
- English, Hindi, Gujarati – *All professional proficiency or above*

## Experience

---

Software Engineer	Peerbits Solutions	Ahmedabad, GJ, India	07/2021 - Current
<ul style="list-style-type: none"><li>• Collaborated with a team of developers to build mobile apps (<a href="#">Trellah Shipper</a> and <a href="#">Trellah Carrier</a>) that enables shippers and carriers to work directly with one another through an auction-like format. Shippers will enjoy the ability to negotiate rates with multiple carriers, have real-time tracking of their shipments, lower costs, and work with a trusted pre-screened network of carriers. Carriers make more money for every mile, receive immediate payment, and manage their own business.</li><li>• Developed a mobile app <a href="#">Bluecold</a> using <b>Flutter Framework</b>. The app has <b>1K+</b> downloads on <b>Google Play Store</b> and App Store. It is an IOT based application used to control the temperature and pressure and calculate the cooling capacity required for cold rooms and blast rooms. The data of temperature and pressure is represented using Graph, Gauge, Data tab, etc.</li><li>• Performed R&amp;D on Real Time Data (Web Sockets), Working of data plans in eSIM, Geo Json, Indoor Navigation (AR Kit)</li><li>• Designed project requirements like API Documentation with Project Manager and Backend Team.</li><li>• Experience in working on dedicated projects and discuss the requirements of the projects with clients.</li><li>• Improved my public speaking skills by taking sessions on the latest technology trends with colleagues and technical staff members. Also taken an expert session at the college regarding Flutter and its Future.</li></ul>
