### EDUCATION

---

<b>PRIYADARSHINI INSTITUTE OF TECHNOLOGY &amp; SCIENCE,TENALI -ANDHRA PRADESH</b> Bachelor Of Technology(Mechanical Engineering) (7.38 CGPA)	<b>2019-2022</b>
<b>ESC GOVERNMENT POLYTECHNIC,NANDYAL</b> Diploma In Mechanical Engineering) (79.6%)	<b>2019-2016</b>
<b>RAVINDRA HIGH SCHOOL, NANDYAL</b> Secondary School Of Certificate (8.8 CGPA)	<b>2016-2015</b>

### SKILLS

---

Backend Technologies: JAVA,JDBC

Framework: Spring and Hibernate ORM

Skill: MS Word

Databases: MySQL

SOFT Skills: Communication, Problem-Solving and Organisation skills.

### PROJECTS

---

#### 1.EXPLORE TRAVELS Using Java DataBase Connectivity

[GitHub](#)

A new Travels and Logistics company plans to automate their booking operations using a JDBC-based application. The application will load the company's logo and display a menu upon successful loading. Users can register as New User, plan their journey, and generate a bill based on fare and passenger count. The application aims to streamline the booking process, provide a user-friendly experience, and offer options like rescheduling travel dates..

#### 2.EXPLORE Travels Using Hibernate ORM FrameWork

[GitHub](#)

The Travels and Logistics company aims to automate booking operations using Hibernate, an ORM framework. The Hibernate-based application loads the company's logo and displays a menu upon successful loading. Users can register as New User, plan their journey, generate bills based on fare and passenger count, and utilize features like rescheduling travel dates. The focus is on streamlining the booking process and providing a user-friendly experience through Hibernate's powerful object-relational mapping capabilities.

#### 3.EXPLORE TRAVELS Using Spring Framework \*\*\*OnGoing

[GitHub](#)

The Travels and Logistics company automates booking operations using the Spring Framework with JavaServer Pages (JSP). Users can register, plan journeys, generate bills, and reschedule travel dates. Spring's MVC architecture and JSP's dynamic rendering enhance the user experience, while Spring features ensure data integrity and security.
