## ABOUT

*I have proven abilities of time-management skills. I have successfully managed and completed projects on time. I strive to take up new challenges and deliver results with excellence. Excellent problem-solving and communication skills*

## SKILLS SUMMARY

- **Languages:** HTML5, CSS3, JavaScript/ECMA Script, ReactJs, Redux, NodeJs, Express, MongoDB, Bootstrap, tailwind, graphql
- **Tools:** GIT, JIRA , Postman
- **library:** Webpack, Babel, Npm, AntDesign

## EXPERIENCE

- **ITCombine** Noida, Delhi  
*React Developer* *Feb 2022 - Present*
  - Developed new features for OneAssist Consumer Solutions (Our Client) as a Software Developer, resulting in improved user experience. Manage separate tasks and modules.
  - Collaborated with product teams to resolve issues in an agile environment (Jira).
  - Implemented efficient solutions to improve the overall performance of the product and know about Restful Apis
  - Utilized browser-based debugging tools and techniques to identify and address code issues quickly
  - Created user-friendly documentation to ensure understanding of the software product.
  - strong familiar with DOM manipulation
  - Intergrated with third-party Apis
  - Understanding with modern front-end build pipelines and tools
- **Newtoon School** Bangalore, Karnataka  
*Fullstack Development Internship* *Oct 2021 - Mar 2022*
  - Developed full-stack web development skills. including JavaScript, Nodejs, Redux, and React.js (modern JavaScript frameworks ECMascript)
  - Creating REST API for different projects.
- **Feedback Consultancy** Bangalore, Karnataka  
*May 2019 - Feb 2020*
  - Developed extensive voice recognition skills while working on a project to hear and solicit consumer feedback
  - Utilized Excel to organize and analyze large amounts of consumer feedback data

## EDUCATION

- **Vellore Institute of Technology** Chennai, TamilNadu  
*Masters of Computer Science; GPA: 7.59* *Aug 2015 - July 2017*  
*Courses: Computer Science.*
- **Institute of Technology and Management** Gwalior, MadhyaPradesh  
*Bachelor of Computer Science; PER: 59* *March 2010 - May 2013*

## ACADEMIC PROJECTS

- **Travelocity**
  - Developed web-based hotel management system for Travelocity utilizing React.js, State management Library Redux and Material-UI
  - Constructed UI components to improve user experience and interactivity
  - Implemented efficient data retrieval and storage systems to provide accurate room information
  - Utilized Slider Component to display images of a hotel room for the booking.
  - Executed end-to-end ticket booking process for customers
- **Employee Detail**
  - Create APIS for the backend using NodeJs.

- All fields data is saved to the database when the user clicks the save button. Here I'm using React, MongoDB, Mongoose, and Node here.
- debugging to optimize performance.

- **HotStar OTT Platform**

- Developed Hotstar OTT entertainment platform using HTML, CSS, and JavaScript
- Implemented a slider that displays movie images with accompanying information
- Designed and built functionality to add movies to a watch list and remove them from the list. Build reusable, high-quality libraries which can be used across multiple projects.
- Stored data using LocalStorage to ensure the persistence of user input
- DOM manipulation in the whole project

## CERTIFICATION

---

successfully done NPTEL Web development course IIT Kharagpur, 2016
