Projects:

Akzonobel:

The Akzonobel project is one of the event organizers applications which have an admin panel to create an event for live users with all the event related information like(hotel detail, flight booking details, event information, address and about to host etc.)

SkyShuttleBus:

SkyShuttleBus app is For all your Shuttle Bus Service and Timetable information. Locations cover Sky Livingston, Sky Osterley and Sky Elstree. All you need and all in one useful app. Get access to the latest timetables, service updates per bus, per route. All in real time! Specifically designed to support your commute to and from these Sky sites, operating connections between tube, train and town locations using Sky dedicated bus services. Jump on board.

BBC Earth:

The BBC Earth Project is about animal face shape filters based applications which have different types of deepAR library file with AI based cameras which help you to take pictures or video with animal faces and share those pictures or videos with you friends via social media directly.

Take Your Seat:

This project is about all the sports which have fixtures for upcoming events with their grounds and routing google map with your current location and also they give you train timing information for users.

JavaGo:

The Java Go enables users to go on hassle-free coffee runs by eliminating the need to write orders or chase up colleagues to pay you back. The app connects users to great independent coffee shops in their area and allows them to search for a specific type or category of café.

The app also simplifies the use of loyalty cards by having digital loyalty cards which are automatically stamped when an order is made..

Support Projects:

1. My Livin
2. Fizzlist
3. NGE
4. ESB
5. What's in Dairy Strabane

Common Libraries:

- ➔ **GetX** : A lightweight and powerful package that offers various utilities for state management, navigation, dependency injection, and internationalization.
- ➔ **Firebase**: A comprehensive suite of cloud-based tools and services offered by Google. It provides ready-to-use solutions for crashlytics, authentication, real-time databases, cloud messaging, storage, and more.
- ➔ **Device Info**: This package is a Flutter plugin that provides device information for both Android and iOS platforms. It allows you to retrieve various details about the device running your Flutter application, such as the device model, operating system version, unique identifiers, and more.
