

Good strength of working with team, strong ability to work creative and determination.

EDUCATION

Bachelor of Engineering (Computer Engineering)

Government Engineering College

08/2019 - 06/2022

Gandhinagar

Courses

- CGPA- 8.78

Diploma (Computer Engineering)

R.C.Technical Institute

08/2016 - 06/2019

Ahmedabad

Courses

- CGPA-9.02

PERSONAL PROJECTS

Made a "BOOK CRUD API" with Node,Express and MongoDB and Reactjs

- This is a basic create, read, update, delete (CRUD) operations example in **Node.js (Express)** and **MongoDB** all you can perform frontend as **ReactJS**.
- All data can be store on mongodb compass.
- Link:- <https://6471af6e2837564d86a2e8da--sparkling-paletas-d1a779.netlify.app/>

Create an "CodePen Clone" using ReactJS.

- It works just like **codepen.io**.
- This project is a clone of the Codepen website to run all **HTML**, **CSS** and **Javascript** part.
- Link:- <https://cozy-mousse-66c12f.netlify.app/>

Create a "CRUD Application" using Vanilla JavaScript

- This project is able to **create data**, have access to the data in the UI by **reading** the data, **update** or **edit** the data, and **delete** the data..
- This project is list of all data in table manner.

WORK EXPERIENCE

Junior Frontend Developer

WeblinesIndia

08/2022 - 09/2023

ReactJS Developer

Agile Infoways

11/2021 - 07/2022

ReactJS Intern

Agile Infoways

08/2021 - 10/2021

TECHNICAL SKILLS

HTML

CSS

JavaScript

Typescript

ReactJS

NodeJS

MongoDB

MYSQL

LIVE PROJECTS

SPORTS-FURY (06/2023 - Present)

Description:An e-commerce website built with **ReactJS**, **Redux**, and an **admin control panel** for inventory management and order processing.

Responsibilities

Developed e-commerce interfaces including product listings, cart, checkout, and admin panels, utilizing Redux for state management. Collaborated across design and backend teams to ensure responsive design, performance optimization, and user-centric features

RENTAL-SIMPLIFIED (07/2023 - 07/2023)

Description: An online marketplace platform with user and admin portals, built using **NodeJS** and **MongoDB**. Features include product listings, user profiles, shopping carts, and an admin control panel for managing products.

Responsibilities

Engineered RESTful APIs for user registration, product management, and admin control using MongoDB, collaborating with front-end teams to ensure robust communication and functionality.

CERTIFICATES

Completion of JavaScript Ultimate Course On Udemy

Completion of React-The Complete the guide on Udemy

Completion of NodeJS - The Complete the guide on Udmey

Certified of successfully cleared the assessment of javascript (basic) On Hackerrank

Certified of successfully cleared the assessment of javascript (intermediate) On Hackerrank
