Career Objective

A curious learner and transforming ideas into stunning cross-platform An excellent team player searching for a challenging position as a Flutter developer to utilize my technical competencies and working knowledge of software development, troubleshooting, and excellent communication skills to grow as a Flutter developer.

Work Experience

1. DropIn: - Application(Android and iOS) with Web

- This project's goal is to enable live location sharing within a 50-kilometer radius, and users can interact with any other users who have accepted location requests.
- In this project, there are two main kinds of modules: business and user.
- User Module: The user can build a drop-in and display it on the map screen by providing information such as category, location, title, description, and photographs, users have the option of seeing drop-ins they have produced and chatting with other users.
- Business Module: The user can create businesses with the following information (Category Location, Business Name, Description, and Photos), and those businesses will appear on maps. Additionally, when a business is created, a drop-in user can view their own profile, chat with other businesses, and rate the business.

2.Uk Income Tax Calculator- Application(Android and iOS) with Web

- The UK Income Tax Calculator's goal is for the User to be able to calculate their income and view every aspect of their tax liability. A premium plan must be purchased by the User in order to download the pdf. According to their saved money balance, the user can create their own goals.

3. Wp Direct -Application(Android + iOS)

- This project's goal is to allow users to message any other user on this platform without saving their phone number, including (WhatsApp , SMS). Users can also save any crucial messages. Additionally, Google adverts will appear when using the application (Admob)
 - PlayStore :- <https://play.google.com/store/apps/details?id=com.equitysoft.wpdirectmessage>
-
