

Summary:

- I have 2 years of experience in Front End development and web applications using technologies such as JavaScript, **React JS**, **REDUX**, **Node js**, jQuery, Bootstrap, HTML5 and CSS.
- Developed MVC based web applications using **ReactJS** on a client side and **Oracle server** as database.
- Active involvement in development of application using multi-tier technologies like **ReactJS**, **Redux**, Java Script, jQuery, XML, JSON, HTML5, CSS3.
- Worked on **React Hooks 16.8** version.
- Good working knowledge to automate the build process using Maven.
- Experience in using IDE tools such as STS and sublime.
- Knowledge of Version Control Systems like **GIT**.
- Worked with Issue Tracking systems like **JIRA**.
- Working knowledge of software development methodology like **AGILE** using scrum framework.
- Strong proficiency in **JavaScript**, including DOM manipulation and the JavaScript object model
- Thorough understanding of React.js and its core principles
- Experience with popular React.js workflows (such as Flux or Redux)
- Familiarity with newer specifications of **ECMAScript**
- Familiarity with **RESTful APIs**
- Knowledge of modern authorization mechanisms, such as **JSON Web Token**
- Experience with common front-end development tools such as **Babel**, **Webpack**, **NPM**.
- Familiarity with code versioning tools { {such as Git, SVN, and Rational Team Concert (RTC)}}.
- Involved in Daily Scrum meetings, Sprint planning and estimation of the tasks for the user stories, participated in retrospective and presenting Demo at end of the sprint
- Good Communication and interpersonal skills acquired from experience. Self - motivated person with good team playing capabilities.
- Quick learner, Strong problem solving and troubleshooting skills, highly motivated team player with excellent organizational and analytical skills

Technical Skill Set:

Primary Skills : HTML5, CSS3, JavaScript, jQuery, React.js, ES6, Agile, ReactJS v15.2, React Bootstrap, AJAX, JSON, REST API, Redux, NodeJS, ExpressJS, JIRA, GIT, Agile.

Secondary Skills: Json, Xml, Ajax, Less Css, Bootstrap.js, Redux, Jenkins

OS : MS-DOS, Windows 7

Tools : MS Office, MS Excel, Photoshop, Notepad++

Database : MongoDB, MySQL, Oracle.

Educational Qualification:

- B-Tech from JNTU-Hyderabad.

Professional Experience:

- Working as a Consultant Tecsolv Software Technologies ,Bangalore from Jun 2021 to Till Date.

Project #1: ABN AMRO Bank

Technologies Used : ReactJS, Redux, Spring, Jenkins API, MongoDB.

Servers : Tomcat

IDE Used : Eclipse, VSCode.

Duration : January 2022-Tilldate.

Project Description:

ABN AMRO Bank N.V. is a Dutch bank with headquarters in Amsterdam. ABN AMRO Bank is the third-largest bank in the Netherlands. It was re-established in its current form in 2009, following the acquisition and break-up of the original ABN AMRO by a banking consortium consisting of Royal Bank of Scotland Group, Santander

Group and Fortis. Following the collapse of Fortis, who acquired the Dutch business, it was nationalized by the Dutch government along with Fortis Bank Nederland. It was relisted as a public company again in 2015.

The bank is a product of a long history of mergers and acquisitions that date to 1765. In 1991, Algemene Bank Nederland (ABN) and AMRO Bank (itself the result of a merger of the Amsterdam Che Bank and the Rotterdam Che Bank in the 1960s) agreed to merge to create the original ABN AMRO. By 2007, ABN AMRO was the second-largest bank in the Netherlands and the eighth-largest in Europe by assets. At that time the magazine *The Banker* and Fortune Global 500 placed it 15th in the list of world's biggest banks and it had operations in 63 countries, with over 110,000 employees.

Roles & Responsibilities:

- Responsible for creating efficient design and developing User Interaction screens / SPA using HTML5, CSS3, JavaScript, Redux, React.JS and Bootstrap.
- Involved designing in web pages using HTML5, CSS3, JavaScript, Bootstrap, SASS, LESS, React.js, Redux, Flex, Mongo DB.
- Used React Router for routing the redux app to connect redux and react to support routes.
- Worked on React Hooks 16.8 Version
- Worked on state, specs, props and events to create interactive React JS components.
- Implemented MVVM architecture using React and Redux framework.
- Experience with common front-end development tools such as Babel, Webpack, and NPM.
- Used Middleware, Redux-Promise in application to retrieve data from Backend and to also perform RESTFUL services.
- Used React concepts like JSX (JavaScript Syntax Extension), components, state and props.
- Implemented CSS Box Model and styled web pages using CSS pre-processors LESS and implemented Mix ins, functions, custom grid systems.
- Developed single page applications using React Redux architecture, ES6, web pack and grunt.
- Building components library, including Tree, Slide-View, and Table Grid.
- Have worked on AWS to integrate the server side and client-side code.
- Experience in RESTful web services to integrate between Server side to Client Side
- Worked with JASMINE unit test framework to write unit tests for JavaScript code.

Environment: HTML5, CSS, JavaScript, jQuery, React, Redux, ES6.

Project #2: BRF SA Brazil

Duration : Jun 2021 to Dec2021.

Description: BRF S.A. is a Brazilian company. BRF is one of the biggest food companies in the world, with over 30 brands in its portfolio, among them Sadia, Perdigão, Qualy, Paty, Dánica and Bocatti. Its products are sold in over 150 countries, in all five continents. More than 100 thousand employees work at the company, which owns more than 50 factories in eight countries: Argentina, Brazil, United Arab Emirates, Netherlands, Malaysia, United Kingdom, Thailand and Turkey.

In 2016, the company sold over 4 million tons of food and made more than 600 thousand monthly deliveries. Over 13 thousand integrated producers work daily on the field to supply fundamental ingredients of the food produced by the company: poultry and domestic pig

Responsibility:

- User story requirements and analysis to meet the stakeholder's requirements under **agile** methodology and maintain the monthly release delivery.
- Applied **JWT** middleware to backend for authentication and used **Passport** for security purpose.
- Worked in **TDD** (Test-Driven Development) and performed testing using **Jasmine** and **Karma**.
- Sprint Planning: Discussing the current scope with client and raising the clarifications.
- User Story Estimations: Estimating User stories and assigning points based on complexity along with Scrum Master.
- Defect management and tracking related to various builds.
- Providing the Html to the finalized design and incorporating event handling using **Jquery** and **JavaScript**.
- End to end working of the designed html design in eclipse.
- Analysing that the developed code is in compliance with UI standards.

- Documented the UI use cases planned for the product release
- Peer Reviews and Sprint Reviews to meet coding standards.
- Defect fixing of java and UI bugs to deliver high quality software.

Environment: HTML, CSS, JavaScript, jQuery, React, Redux, ES6
