EDUCATION

Diploma In Information Technology

Gujarat Technological University

8.38 CGPA

SKILLS

- Basic Frontend
Javascript, bootstrap, Material UI, Reactstrap, HTML5, Scss, Sass, CSS3
- Build Tools:
Package Management: Npm, yarn, pnpm
Task Runner: CLI
- Frontend Javascript frameworks
ReactJS, NextJS, ReduxJS
- Backend Javascript framework
NodeJS
- Development Tools
VSCode, Sublime Text
- Operating Systems
Mac, Windows, Ubuntu (Linux)
- Version Control Tools
Git
- Project Tracking Tools
GitLab, Trello
- Project Management Methodologies Agile model.

WORK HISTORY

Software Engineer | IndiaNic Infotech Ltd.

Ahmedabad - July 2021 - Current

- Organized and detail-oriented with a strong work ethic. Demonstrated leadership skills in managing projects from concept to completion.
- Strengthened communication skills through regular interactions with others.
- Informed internal personnel and external stakeholders of project milestones.
- Participated in software field testing to verify performance of developed projects.

1. RTF Yliway

● Project Brief

RTF intends to offer a solution to this problem through a platform that allows users to make video courses, training rooms, coaching rooms, net rooms, thematic rooms and other services available to users according to the model described below. The Platform has been designed with the aim of encouraging value transactions between the entities that make up the ecosystem. The goal is to achieve the same level of engagement as LinkedIn or higher with differences between user types.

● Technology

Reactjs, Nextjs, HTML, SCSS, bootstrap, python, node

● Highlights

Various user roles (Teacher, Trainer, Coach, Host)

Teacher and Trainer can create and schedule sessions. Student can book the session and complete the payment using Stripe. Admin can manage all the Users, Roles, Accounts and Billing Details.

● Key Challenges and results

Integrating PubNub is a bit challenging due to less document support. So with the help of PubNub technical support we have achieved the one-to-one chat messaging.

● My Role

Front-End Developer / Using React and Next Js

2. Forward Freight Logistics

● Project Brief

Forward Freight Logistics are one of the biggest giants in Logistics or you can say Logistics brokers where they are providing services like Find best Carrier company or individuals for shipper organizations to ensure best delivery of their shipping loads timely with best drivers. We have to develop the entire physical system into online mode which includes web sites, web applications and mobile applications. Where we have to manage the entire shipping of load from adding that particular load into the system to deliver that load with Multiple status management for load, equipment management, auction for load, sharing the load from admin, online signature on Rate Confirmation Sheet, Live Tracking of the Load etc.. Since it is in Hybrid technology like for frontend React Js, for backend Node Js, and for mobile flutter we have to deal with many logical processes like bidding in auction and assigning the load automatically after the auction ends.

● Technology

Reactjs, Nextjs, HTML, SCSS, Bootstrap, Nodejs, MongoDB, Flutter

● Highlights

Various user roles (Admin, Revira, Shipper, Carrier, Driver), Shipper can create/edit/delete/cancel a load. Carrier can bid on load which is posted by shippers. Driver can manage loads and change load status. Various Graph facility for review shipper, carrier, load, earnings details, Third-party learning tool integration (us-dot number). Admin can manage all the shippers, carriers, loads, and CMS content. Rivera user only manages Shippers details and loads, Communicate with admin and each other users, Live notification, email functionality and tracking rating.

● Key Challenges

We have faced challenges to integrate live tracking and live rating for users. FFL management is very important and logical

functionality, because of change in scope, we need to rework it, but in the end we provided stable functionality based on client requirements.

● My Role:

Front End Developer / Using React and Next Js
