Project

Hu Chu Gujarati-News website

- The "Hu Chu Gujarati" news website is a modern and dynamic platform designed to provide the latest news and updates in the Gujarati language.
- The website is built using cutting-edge technologies such as **React.js for the frontend, Node.js for the backend, and MySQL** for data storage.
- It includes a robust admin panel to manage user roles and ensure accessibility control.
- Admin can easily add, edit, or delete news articles through a secure and user-friendly admin panel.

Ecommerce Website

- The "Modern Ecommerce Website" is an advanced online shopping platform built with cutting-edge technologies such as **React.js, Redux, Redux Saga, Tailwind CSS, HTML, and CSS**.
- A clean and user-friendly interface with intuitive navigation and responsive design for various devices and screen sizes.
- It provides a seamless and visually appealing shopping experience for users, along with robust state management and efficient asynchronous operations.

Dynamic form Generator like google form

- The Dynamic Form Generator is a web application that allows users to create customizable forms with various types of fields, such as radio buttons, input text fields, and option selections.
- Inspired by Google Forms, this application empowers users to design forms tailored to their specific needs.
- It is built using **ViteJs, ReactJS** for front-end development, **Tailwind CSS** for styling, and **Ngrok** for link generation, enabling seamless form creation and sharing
